

POWER SLIDE® CHAIN LUBE

>>Description

Torco Power Slide® Chain Lube is an MPZ® formulated lubricant with extreme wear and rust protection chemistry. Quickly penetrates deep into bushings, pins, bearings and rollers then sets to a stable grease that will not fling off or melt under high temperature conditions. Power Slide Chain Lube is designed to exceed the demands of high performance and racing conditions.

>>Features

- >Fling free technology
- >Superior anti-wear and anti-rust protection
- >Penetrates deep into bushings, pins, bearings and rollers
- >For standard and o-ring chains

>>Application

Recommended for use on all standard and o-ring chain applications.

>>Directions

Clean the chain by washing it with solvent or using contact cleaner before applying Power Slide. Shake can vigorously. Hold the can 4 to 6 inches from chain and overlap the spray to get good coverage with a wet film. Rotate the sprocket and chain for good penetration into the linkage and roller bushings.
